Solutions for Community Sustainability

March 4, 2010

Northern BC Advantage

- Natural abundance of wood fibre
- Largest producing and exporting region for forest and bioenergy products
- Record of industrial achievement, entrepreneurial activity and leadership
- Research intensive university
- Communities committed to sustainability and collaboration

bioenergypartnership.ca

Strategic Plan

- Vision
 - for Northern British Columbia to be the national leader in a technologically advanced, forest-based bioenergy industry
- Mission
 - to be a catalyst for economic diversification through the development of a vibrant, innovative and sustainable forest-based bioenergy industry in Northern British Columbia
